- Children need safe, strong families to succeed in life.

- Prevention is paramount, and all actions should focus on improving family situations.
- Children belong with families-their own, when safe to do so and when it is not, with a safe, permanent family as soon as possible.
- The community must be a partner in supporting and strengthening both birth families and resource families.

Intake Process: I offer a free consult for anyone looking for advice/advocacy. Free screening for the sober living program. Call or walk in to schedule an appointment.

Description: Men's Sober Living program. I also act as an advocate for those individuals that are slipping through the cracks of the probation department/justice system. Many clients have come to me just looking for someone who cares and understands what they are going through. I offer advice based on my real life experiences with addiction and recovery and I give an unfiltered version of the truth. I spend as much time as it takes with an individual and do not cut them off at a time limit. I advocate for individuals needing representation with the court and probation department. I go the extra mile in fighting for them and making sure they are not treated as just another statistic.

Hours: Monday through Friday, 9:00am to 5:00pm

Program Fees: Sober living is \$125/week. Advocacy/Consulting is billed based on services rendered. Very minimal fees are included with this type of work simply because I cannot spend all of my hours in a day working for free without any funding. My recommendations however go a long way with the superior court and probation dept.

Description: Health in Arizona Policies Initiative - Addressing Population Health Needs in Arizona Health in Arizona Policy Initiative (HAPI) utilizes evidence-based approaches to address population health needs including the:

- ❖ Health in All Policy Framework
- ❖ Health Impact Pyramid
- ❖ National Prevention Strategy

Health in All Policy

- Identifies the underlying factors which are drivers of health costs in society including, but not limited to the:
 - Conditions in which people are born, grow, live, work and age, including the current health system focus on treatment vs. prevention.
 - Growing number of individuals with chronic disease yet who do not utilize health systems to better control and manage conditions.
 - Isolation of “health” to the environment of health systems, not recognizing the impact other environments have on health outcomes.
 - Other determinants which impact health including race, income, safety, community design, and access to basic necessities.
- Focus on innovative solutions which address these drivers of health costs including:
 - Identifying the role of governments and communities to create environments more conducive to health.
 - Establishing partnerships between “nontraditional” health partners such as business, city planning & zoning, military, etc.
 - Exploring opportunities to incorporate health concepts into new policy areas, even if health isn’t the central focus, such as housing, economic development, etc.

Twice a year we help sponsor a Gila Valley-wide campaign selected parts of the valley (communities, housing tracts, desert areas, recreation sites, etc.) using as many as 450 - 500 volunteers in a single morning. It has been a dramatically beneficial activity.
